WHY HIVE

el problema:

I have to know something very special but because of Corona it is difficult to talk to other people, maybe I am even a risk patient and I don't have the possibility to enter the campus.

Or

I need to know something very specific and I don't know who could help me with it

The solution:
A system that allows all students to ask their questions and receive answers online and offline, the platform is designed as a self-moderating system.

Moderation system
The moderation is made possible by the fact that users can rate other users,
are able to merge, add or delete similar topics with one wire.
The system is secured by a Kudos system which is based on the ratings.
Final decisions like deleting a message or merging questions have to be confirmed by someone with a very high rating or by several low ranking users. This prevents someone from randomly deleting content. Actions such as deleting have respective cooldowns, so even if a user with high Kudos or 2 with low kudos wants to delete randomly, this is not possible.
You have the possibility to suggest a merge between two questions, the question owners can then confirm it.
The platform must also provide some kind of retention system in which deleted messages are retained for about 30 days in order to be able to undo unlawful deletions.

Presentation:

-Introduction: - Story, why?
    -Collaborative Workspace for code
        -Bringing people together sharing knowledge

-Quick overview:
    -Forum like Stackoverflow
        -Questions and answers
        -Meetings
        -Discussions
        -connect to fellow students
-Our approach:
    -Everyone can ask -hive mind (questions)
Basic function
    -Connect with peers
    -Share knowledge
    -

(regulations)
-Users:
    - Get lvl by participating (asking and answering)
    - Merge similar questions
    - flag inappropriate questions
-Set guidelines:
    -be nice/respectful
    -help each other
    -point at similar questions (notify followers)
-feedback on answers:
    -votes (ranking)
    -pin to start page? -announcements
-delete questions/answers
    -1 flag -2 confirmation
-merge questions/topics
        -only with a little description/ link (pop-up at the top of a question)
    -1 flag → (notification to) author / 2 commits
-same people reporting and confirmation deletion of posts get flagged
(questions)
